The Art of Modeling Stars in the 21st Century (IAU S252) International Astronomical Union. Symposium, 2008-12-18
Stellar models are the very basic building blocks with which we build up our knowledge of the Universe. New numerical experiments are heralding a new level of sophistication in our ability to model, and understand, how stars work. This volume provides an overview and the most recent advances in modeling of stellar structure and evolution. Modeling of stars relies on our understanding of the detailed physical processes happening in stars, and the most recent observations of stars made by modern large telescopes and current high technologies. IAU Symposium 252 presents the most recent developments in five key areas, including: improvements of the physical ingredients of stellar models; the evolution of low and intermediate mass stars; the evolution of massive stars; close binary evolution; and stellar physics in the era of very large telescopes. This overview of stellar research is at a level suitable for research astronomers and graduate students.

Documentary's Expanded Fields Jihoon Kim, 2022
Documentary's Expanded Fields: New Media and the Twenty-First-Century Documentary offers a theoretical mapping of contemporary non-standard documentary practices enabled by the proliferation of new digital imaging, lightweight and non-operator digital cameras, multiscreen and interactive interfaces, and web 2.0 platforms. These emergent practices encompass digital data visualizations, digital films that experiment with the deliberate manipulation of photographic records, documentaries based on drone cameras, GoPros, and virtual reality (VR) interfaces, documentary installations in the gallery, interactive documentary (i-doc), citizens' vernacular online videos that document scenes of the protests such as the Arab Spring, the Hong Kong Protests, and the Black Lives Matter Movements, and new activist films, videos, and archiving projects that respond to those political upheavals. Building on the interdisciplinary framework of documentary studies, digital media studies, and contemporary art criticism, Jihoon Kim investigates the ways in which these practices both challenge and update the aesthetic, epistemological, political, and ethical assumptions of traditional film-based documentary. Providing a diverse range of case studies that classify and examine these practices, the book argues that the new media technologies and the experiential platforms outside the movie theater, such as the gallery, the world wide web, and social media services, expand five horizons of documentary cinema: image, vision, dispositif, archive, and activism. This reconfiguration of these five horizons demonstrates that documentary cinema in the age of new media and platforms, which Kim labels as the 'twenty-first-century documentary, ' dynamically changes its

boundaries while also exploring new experiences of reality and history in times of the contemporary crises across the globe, including the COVID-19 pandemic.

The Happiness Effect Donna Freitas, 2017 Sexting. Cyberbullying. Narcissism. People-and especially the media-are consumed by fears about the effect of social media on young people. We hear constantly about the dangers that lurk online, and about young people's seemingly pathological desire to share anything and everything about themselves with the entire world. Donna Freitas has traveled the country, talking to college students about what's really happening on social media. What she finds is that, while we focus on the problems that make headlines, we are ignoring the seemingly mundane, but much more widespread, problems that occur every day. Young people, she shows, feel enormous pressure to look happy all the time-and not just basically content, but blissful, ecstatic, inspiring and successful in their personal, professional, and academic lives-regardless of how they actually feel. Of course, these young adults are not that happy, at least not all of the time, and the constant exposure to the seemingly perfect lives of other people on social media only makes them feel worse. What's more, far from wanting to share everything about themselves, they are terrified of sharing something that will come back to haunt them later in life. The rise of social media has brought about a dramatic cultural shift: the need to curate a perfect identity online that often has little to do with reality. The consequences, Freitas shows, can be very real. Drawing on an online survey and in-person interviews with students from thirteen campuses around the U.S, Freitas offers a window into the social media generation and how they use Facebook, Snapchat, and Twitter, and other online platforms. She presents fascinating insights about how these people are consciously creating alternate identities for themselves, while also suffering from the belief that the other people they encounter online really are as perfect as their profiles appear. This is an eye-opening look at the real world of social media today

Edible Oil Processing Wolf Hamm,Richard J. Hamilton,Gijs Calliauw,2013-08-05 Oils and fats are almost ubiquitous in food processing, whether naturally occurring in foods or added as ingredients that bring functional benefits. Whilst levels of fat intake must be controlled in order to avoid obesity and other health problems, it remains the fact that fats (along with proteins and carbohydrates) are one of the three macronutrients and therefore an essential part of a healthy diet. The ability to process oils and fats to make them acceptable as part of our food supplies is a key component in our overall knowledge of them. Without this ability, the food that we consume would be totally different, and much of the flexibility available to us as a result of the application of processing techniques would be lost. Obviously we need to know how to process fatty oils, but we also need to know how best to use them once they have been processed. This second edition of Edible Oil Processing presents a valuable overview of the technology and applications behind the subject. It covers the latest technologies which address new environmental and nutritional requirements as well as the current state of world edible oil markets. This book is intended for food scientists and technologists who use oils and fats in food formulations, as well as chemists and technologists working in edible oils and fats processing.

Humbug! Wendy Jean Katz,2020-02-04 Approximately 300 daily and weekly newspapers flourished in New York before the Civil War. A majority of these newspapers, even those that proclaimed independence of party, were motivated by political conviction and often local conflicts. Their editors and writers jockeyed for government office and influence. Political infighting and their related maneuvers dominated the popular press, and these political and economic agendas led in turn to exploitation of art and art exhibitions. Humbug traces the relationships, class animosities, gender biases, and racial projections that drove the terms of art criticism, from the emergence of the penny press to the Civil War. The inexpensive “penny” papers that appeared in the 1830s relied on advertising to survive. Sensational stories, satire, and breaking news were the key to selling papers on the streets. Coverage of local politicians, markets, crime, and personalities, including artists and art exhibitions, became the penny papers’ lifeblood. These cheap papers, though unquestionably part of the period’s expanding capitalist economy, offered socialists, working-class men, bohemians, and utopianists a forum in which

they could propose new models for American art and society and tear down existing ones. Arguing that the politics of the antebellum press affected the meaning of American art in ways that have gone unrecognized, Humbug covers the changing politics and rhetoric of this criticism. Author Wendy Katz demonstrates how the penny press's drive for a more egalitarian society affected the taste and values that shaped art, and how the politics of their art criticism changed under pressure from nativists, abolitionists, and expansionists. Chapters explore James Gordon Bennett's New York Herald and its attack on aristocratic monopolies on art; the penny press's attack on the American Art-Union, an influential corporation whose Board purchased artworks from living artists, exhibited them in a free gallery, and then distributed them in an annual five-dollar lottery; exposés of the fraudulent trade in Old Masters works; and the efforts of socialists, freethinkers, and bohemians to reject the authority of the past.
