Remote Sensing of Evapotranspiration (ET) Pradeep Wagle, Prasanna Gowda, 2019-10-11 Evapotranspiration (ET) is a critical component of the water and energy balances, and the number of remote sensing-based ET products and estimation methods has increased in recent years. Various aspects of remote sensing of ET are reported in the 11 papers published in this book. The major research areas covered by this book include inter-comparison and performance evaluation of widely used one- and two-source energy balance models, a new dual-source model (Soil Plant Atmosphere and Remote Sensing Evapotranspiration, SPARSE), and a process-based model (ETMonitor); assessment of multi-source (e.g., remote sensing, reanalysis, and land surface model) ET products; development or improvement of data fusion frameworks to predict continuous daily ET at a high spatial resolution (field-scale or 30 m) by fusing the advanced spaceborne thermal emission reflectance radiometer (ASTER), the moderate resolution imaging spectroradiometer (MODIS), and Landsat data; and investigating uncertainties in ET estimates using an ET ensemble composed of several land surface models and diagnostic datasets. The effects of the differences between ET products on water resources and ecosystem management were also investigated. More accurate ET estimates and improved understanding of remotely sensed ET products are crucial for maximizing crop productivity while minimizing water losses and management costs.

Corridors écologiques et espèces : grands carnivores dans la région alpine Fabio Corsi, Iacopo Sinibaldi, Luigi

Boitani,2002-01-01 L'établissement du Réseau écologique paneuropéen représente un des objectifs majeurs de la Stratégie paneuropéenne de la diversité biologique et paysagère. La notion de corridor écologique revêt une importance particulière dans la mise en œuvre de ce vaste réseau. Dans ce cadre, le présent rapport porte sur la mise au point d'outils de connaissance destinés à étayer le processus de gestion des populations de grands carnivores. Ce travail s'appuie sur les résultats obtenus dans le cadre du projet sur les zones de conservation des grands carnivores d'Europe (Large Carnivore Conservation Areas in Europe, LCCA), mis en œuvre par l'Istituto di Ecologia Applicata IEA) de Rome pour le compte de l'initiative pour les grands carnivores d'Europe (Large Carnivore Initiative for Europe, LCIE) et grâce à un financement du Fonds mondial pour la nature (WWF).

La Papauté et les croisades / The Papacy and the Crusades Michel Balard,2016-04-22 This volume brings together a selection of the papers on the theme of the Papacy and the Crusades, delivered at the 7th Congress of the Society for the Study of the Crusades and the Latin East. After the introduction by Michel Balard, the first papers examine aspects of crusader terminology. The next section deals with events and perceptions in the West, including papers on the crusades against the Albigensians and Frederick II, and on the situation in the Iberian peninsula. There follow studies on relations between crusaders and the local populations in the Byzantine world after 1204 and Frankish Greece, and in Cilician Armenia, while a final pair looks at papal interventions in Poland and Scandinavia.

E.T.: The Extra-Terrestrial From Concept to Classic Steven Spielberg,Melissa Mathison,2002-03-12 E.T. is the movie that created one of the most recognized icons of the twentieth century, and has become the enduring classic about a remarkable friendship between a boy and an alien visitor. And this is the only book that tells the story of how the movie was conceived and made. Here are stories from director Steven Spielberg, writer Melissa Mathison, producer Kathleen Kennedy, child stars Henry Thomas and Drew Barrymore, and members of the crew. Spielberg and Mathison tell us how E.T. evolved from Spielberg's concept into Mathison's screenplay. We learn about the mechanics of how the alien was made to walk, talk, eat, and phone home. We go on the set to discover, firsthand, how the most memorable scenes were filmed, including the scene of the boys flying over the moon and the good-bye scene that had us in tears. Lavishly illustrated, with full-color stills and behind-the-scenes photographs, *E.T. The Extra-Terrestrial from Concept to Classic* includes the complete screenplay, as well as excerpts from the reviews and feature stories that appeared when the film was first released in 1982. Here is a book that puts you in the director's chair during the making of one of the most extraordinary films ever created.
