Trends in Social Cohesion Council of Europe,2012-01-01 Annotation We are at a point in history where economic inequalities are more widespread each day. The situation of extreme poverty experienced by the majority of the populations in developing countries (Third World countries) often coincides with an absence of democracy and the violation of the most fundamental rights. But in so-called First World countries a non-negligible proportion of inhabitants also live in impoverished conditions (albeit mainly relative poverty) and are denied their rights. The European situation, which this publication aims to analyse, is painful: the entire continent is afflicted by increasing poverty and consequently by the erosion of living conditions and social conflicts. The economic and financial crisis has resulted in the loss of millions of jobs, and created job insecurity for many still working. Economic insecurity raises social tensions, aggravating xenophobia, for instance. Yet the economic and financial crisis could present a good opportunity to rethink the economic and social system as a whole. Indeed, poverty in modern societies has never been purely a question of lack of wealth. It is therefore urgent today to devise a new discourse on

poverty. In pursuit of this goal, the Council of Europe is following up this publication in the framework of the project Human rights of people experiencing poverty, co-financed by the European Commission.

Politics, Property and Production in the West African Sahel Tor Arve Benjaminsen, Christian Lund, 2001 Through a number of case studies from the West African Sahel, this book links and explores natural resources management from the perspectives of politics, property and production.

Social Differentiation Danielle Juteau Lee, Danielle Juteau, 2003-01-01 Social Differentiation examines the economic, political, and normatively defined relations that underlie the construction of social categories. Social differentiation, embedded in inequalities of power, status, wealth, and prestige, affects life chances of individuals as well as the allocation of resources and opportunities. Starting with a theoretical framework that challenges many traditional analyses, the contributors focus on four specific strands of social differentiation: gender, age, race/ethnicity, and locality. They explore the historically specific social practices, policies, and ideologies that produce distinct forms of inequality, in turn revealing and explaining such issues as the formation and maintenance of a gendered order; the privileging of prime-age workers; the penalties incurred by visible minorities in the labour market; the highly disadvantaged position of Aboriginals; and the economic decline of agriculture, resource, and fishing dependent regions. By paying special attention to political processes, norms, and representations, and by indicating how social policies shape economic functioning and relate to normative definitions, this book will interest policy-oriented researchers and decision-makers.

Simulacra and Simulation Jean Baudrillard,1994 Develops a theory of contemporary culture that relies on displacing economic notions of cultural production with notions of cultural expenditure. This book represents an effort to rethink cultural theory from the perspective of a concept of cultural materialism, one that radically redefines postmodern formulations of the body.

Food Rebellions Eric Holt-Gimenez,Raj Patel,2012-11-06 Today there are over a billion hungry people on the planet, more than ever before in history. While the global food crisis dropped out of the news in 2008, it returned in 2011 (and is threatening us again in 2012) and remains a painful reality for the world's poor and underserved. Why, in a time of record harvests, are a record number of people going hungry? And why are a handful of corporations making record profits? In *Food Rebellions! Crisis and the Hunger for Justice*, authors Eric Holt-Giménez and Raj Patel with Annie Shattuck offer us the real story behind the global food crisis and document the growing trend of grassroots solutions to hunger spreading around the world. *Food Rebellions!* contains up to date information about the current political and economic realities of our food systems. Anchored in political economy and an historical perspective, it is a valuable academic resource for understanding the root causes of hunger, growing inequality, the industrial agri-foods complex, and political unrest. Using a multidisciplinary approach, Holt-Giménez and Patel give a detailed historical analysis of the events that led to the global food crisis and document the grassroots initiatives of social movements working to forge food sovereignty around the world. These social movements and this inspiring book compel readers to confront the crucial question: Who is hungry, why, and what can we do about it?

The Law of State Succession D. P. O' Connell,2015-12-03 First published in 1956, this book presents an account regarding the legal principles governing the consequences of changes of sovereignty, focusing particularly on British practice during the preceding 150 years. The legal principles governing British practice are compared with those of other states in order to record the main points of doctrinal agreement or divergence.
